

**Natalie Prichard, M.A.**

Natalie Prichard is a Fancourt Memorial Scholar for The ChildTrauma Academy and a PhD research student at the University of Roehampton, London, having received her B.A. in Occupational Therapy in 2000, a Masters in Counseling in 2005, and most recently a Masters in Play Therapy in 2012.

In her Ph.D. program, she plans to conduct a case-based research project into the use of play therapy as an intervention for children with histories of developmental trauma.

She hopes to use NMT as a framework for understanding each participant child's current functioning from a neurodevelopmental perspective and to utilize the Clinical Practice Tools (i.e. NMT Brain Maps) to gain sense of the child's functioning pre and post play therapy intervention.
